Defining Ethics

What is Ethics According to You?

ethics

1. moral principles that govern a person's behaviour or the conducting of an activity.
"medical ethics also enter into the question"

Similar: moral code, morals, morality, moral stand, moral principles, moral values, rights and wrongs, principles, ideals, creed, credo, ethos, rules of conduct, standards (of behaviour), virtues, dictates of conscience

2. the branch of knowledge that deals with moral principles. "neither metaphysics nor ethics is the home of religion"

What is involved in ethics?

Figure 1: Ethics is complex and it depends on your viewframe.

Does it need to be difficult?

Questions Around AI

A Definition of AI

A cross-disciplinary approach to understanding, modelling, and replicating intelligence and cognitive processes by invoking various computational, mathematical, logical, mechanical, and even biological principles and devices. —**brundage2015taking**

or (Britanica.com) the ability of a digital computer or computer-controlled robot to perform tasks commonly associated with intelligent beings

or (Wikipedia) Artificial intelligence (AI) is intelligence demonstrated by machines, as opposed to the natural intelligence displayed by animals and humans.

First Some Simple Questions

- What is exactly Intelligence and how to measure it?

First Some Simple Questions

- What is exactly Intelligence and how to measure it?
the ability to acquire and apply knowledge and skills (Oxford Dictionary)

First Some Simple Questions

- What is exactly Intelligence and how to measure it?
the ability to acquire and apply knowledge and skills (Oxford Dictionary)
- What is exactly consciousness?

First Some Simple Questions

- What is exactly Intelligence and how to measure it?
the ability to acquire and apply knowledge and skills (Oxford Dictionary)
- What is exactly consciousness?
the state of being aware of and responsive to one's surroundings - Oxford Dictionary

First Some Simple Questions

- What is exactly Intelligence and how to measure it?
the ability to acquire and apply knowledge and skills (Oxford Dictionary)
- What is exactly consciousness?
the state of being aware of and responsive to one's surroundings - Oxford Dictionary
- What is Self-consciousness? Sentience? Life?

- What if AI becomes more intelligent than people? Does it get moral status?

Issues with Morality and AI

- What if AI becomes more intelligent than people? Does it get moral status?
- What about the singularity and benevolence of machines?

Issues with Morality and AI

- What if AI becomes more intelligent than people? Does it get moral status?
- What about the singularity and benevolence of machines?
- What about enhanced humans (e.g. math implant in brain?)

Issues with Morality and AI

- What if AI becomes more intelligent than people? Does it get moral status?
- What about the singularity and benevolence of machines?
- What about enhanced humans (e.g. math implant in brain?)
- What when we can “upload” a human brain? Who owns it? Can we switch it off?

- What if AI becomes more intelligent than people? Does it get moral status?
- What about the singularity and benevolence of machines?
- What about enhanced humans (e.g. math implant in brain?)
- What when we can “upload” a human brain? Who owns it? Can we switch it off?
- Does a conscience and sentient AI deserve rights?

Issues with Morality and AI

- What if AI becomes more intelligent than people? Does it get moral status?
- What about the singularity and benevolence of machines?
- What about enhanced humans (e.g. math implant in brain?)
- What when we can “upload” a human brain? Who owns it? Can we switch it off?
- Does a conscience and sentient AI deserve rights?
- Who are we to decide this?

Way of working

Conclusions

1. Ethics refer to moral the principles that govern our behaviour

1. Ethics refer to moral the principles that govern our behaviour
2. General ideas are innate

1. Ethics refer to moral the principles that govern our behaviour
2. General ideas are innate
3. More complex problems, are not obvious and not everyone agrees. Viewpoint matters.

1. Ethics refer to moral the principles that govern our behaviour
2. General ideas are innate
3. More complex problems, are not obvious and not everyone agrees. Viewpoint matters.
4. Therefore morality cannot be reduced to following rules.

1. Ethics refer to moral the principles that govern our behaviour
2. General ideas are innate
3. More complex problems, are not obvious and not everyone agrees. Viewpoint matters.
4. Therefore morality cannot be reduced to following rules.
5. Data Science is riddled with ethical issues.
